

META HAPTIC STUDIO

HAPTIC TOUCH

TECHNICAL PRESENTATION

META HAPTIC STUDIO

ABOUT THE HAPTIC TOUCH

Haptic feedback creates sensations, touch and vibration

Meta Haptics Studio was updated in 2025

VR users can feel virtual interactions

Goal: make virtual experiences more realistic

THE FUTURE

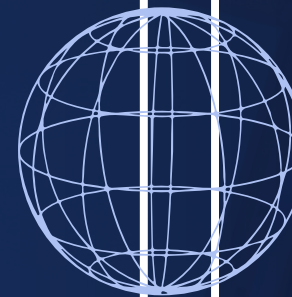

Haptic gloves could simulate touching objects

Special suits could reproduce impacts and pressure

AI could adapt sensations to each user

Virtual objects could feel different depending on their texture

NEEDED TECHNOLOGIES

Advanced
haptic
sensors

Faster
processors
and
technologies

Lightweight
wearable
devices

more
powerfull
AI

BENEFITS

More
immersive
gaming

More realistic
virtual
meetings

New
possibilities
for
accessibility

Better VR
education
and
training
